Supporting international climate policy development through research

- Clipore is an international multidisciplinary research programme focusing on climate policy development.
- Over 40 senior researchers from eight different research organisations in Sweden, Norway, India, and the United States are attached to the programme.
- Clipore works in close contact with international policy-makers, negotiators, industry representatives, as well as other high-level researchers.
- The programme is financed by Mistra, the Swedish Foundation for Strategic Environmental Research, and it has been allocated a total of 109 million Swedish crowns for the period 2004-2010.
